About Us

The photography sessions at Rel Studio is to capture the love and excitement you are feeling for your little ones, as you embark on this exciting journey. It's beautiful to photograph such a precious time in your life – the look of love and anticipation as you cuddle your child. The best time to take photos of your blossoming bump is from 32 – 37 weeks, and between 12 – 16 weeks for your little child just when they start developing neck strength.

Our aim is to professionally capture the prestigious and most beloved moments, without losing their authenticity and hilarious candidness.

We love to know our couples and families before the shoots to get the best results out of everyone. We are not just a service showing up to click photos. We are Artists creating memories for you and your family.
